

SHIVAM DAGADU *Artificial Intelligence & Data Science Engineer*

✉ work.shivamdagadu@gmail.com 🔗 linkedin.com/in/shivamdagadu ☎ 9028200663
📄 github.com/shivamdagadu

AI & Data Science graduate with hands-on experience in machine learning, backend development, and AI-powered application development using Python, TensorFlow, Django, SQL, and OpenCV. Built predictive models and automated analytics pipelines, reducing manual effort by up to 60%. Experienced in REST APIs, computer vision, and data visualization with Tableau and Power BI. Oracle OCI Data Science certified

EDUCATION

B.E. in Artificial Intelligence and Data Science 2021 – 2025 | Airoli, Navi Mumbai
Datta Meghe College Of Engineering (University of Mumbai)

SKILLS

Data Analysis & Visualization Pandas, NumPy, Tableau, Power BI Exploratory Data Analysis (EDA)	Programming Python ,SQL ,HTML&CSS	Web Development React, Tailwind CSS
Frameworks / Libraries Django, TensorFlow	Tools Github, Docker	AI Tools ChatGPT, Cursor, Codex,Claude

EXPERIENCE

E-InnoSec Consulting LLP 10/2025 – 01/2026 | Thane
Software Developer Intern

- Developed and maintained **backend modules** using **Python** to support **GRC (Governance, Risk & Compliance) systems**.
- Automated **data processing and workflow tasks**, improving system efficiency and reducing manual intervention.
- Designed and integrated **RESTful APIs** for backend services and web-based applications.
- Debugged and enhanced existing systems to improve **application reliability, performance, and scalability**.

PROJECTS

Optimum Finance (Full-Stack AI Project)

- Built a full-stack AI-powered personal finance management system to monitor income, expenses, and savings, processing 1,000+ financial records in test scenarios.
- Added a Gemini AI chatbot to automate expense categorization and provide budgeting insights, improving financial analysis efficiency by about 50%.
- Developed the backend using Django with a SQL database to securely manage transactions and user data while maintaining consistency and reliability.
- Automated financial reporting and analytics, cutting manual report generation time by around 60%.
- Published the project in IJEAST, supporting its practical relevance and academic value.

Sign Language Recognition (AI / Computer Vision Project)

- Created a real-time sign-to-text recognition system using computer vision and deep learning to process live video streams in real time.
- Applied MediaPipe for accurate hand landmark detection and OpenCV for video frame processing, making gesture capture reliable in different conditions.
- Built, trained, and optimized TensorFlow-based deep learning models, reaching about 90% accuracy across the tested gesture classes.
- Developed low-latency inference pipelines for fast, near-instant gesture-to-text conversion.
- Highlighted strong experience in ML pipeline development, model training, and deployment for accessibility-focused use cases.

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified Data Science Professional
Oracle, Sep 2025 (Valid till Sep 2027)
